

WORK NOTICE Willow Glen ROW San Jose, California

June 2011

Field Work being conducted beginning July 11, 2011

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work along the Union Pacific Railroad Company's Willow Glen Right-of-Way Site (ROW), in San Jose, California. The Site is located between Minnesota Avenue and Lonus Street (please see the included figure). Work will excavate and remove soil contaminated with metals (arsenic, lead, and cadmium), total petroleum hydrocarbons (TPH) and polyaromatic hydrocarbons (PAHs).

Workers will be in the area starting on **Monday, July 11, 2011, between 8:00 A.M. and 5:00 P.M.** The field work will take about 15 weeks to complete, ending approximately in October. The following work activities will take place:

- Removal of vegetation and selected trees (as determined from an arborist evaluation).
- Staging of heavy equipment, vehicle parking, and trucks entering and leaving the ROW.
- Earth moving activities, including soil removal and handling, and clean fill placement and grading.
- Loading of contaminated soil into trucks and transporting for off-site disposal.
- Workers wearing safety gear operating equipment and managing work.
- Continuous dust suppression and air monitoring activities.

This work will be done according to DTSC reviewed and approved Final Removal Action Workplan, for the ROW. This document and other project related documents are available at:

Dr. Martin Luther King, Jr. Library
